

## [About Friendswood Tech](#) [1]

### **Welcome to Friendswood Tech. Your local freelance resource for small business.**

Whether you are looking for technical assistance, web design, Quickbooks, programming, general hardware and software, or other areas such as PR, marketing and research, we have the contacts you need.

Friendswood Tech is a group of work at home women that joined together to offer their professional resources to local small businesses. All of us were career moms that chose to cut back on hours in order to be available to raise and care for our children. However, we did not want to become has beens in our industry and we found that we missed what we did, but weren't ready to go back to full-time work.

We found a need for small business in our area, and we're here to fill it! Most of us are available for 15-20 hours per week and we accept projects on first come basis.

If you are looking for an area that you don't see listed or available, please let us know, as we may have your resource available.

We look forward to working with you and fulfilling your needs!
